About me

Passionate and results-driven Flutter and Backend (Java) Developer with 6+ years of experience in building scalable mobile and server-side applications. Proficient in developing cross-platform mobile apps using Flutter, with expertise in Firebase, Supabase, and RevenueCat integration. Strong backend development skills in Java (Spring Boot/PostgreSQL).

Additionally, I have hands-on experience with Swift (iOS development) and AI tools to enhance development efficiency. Currently leading a development team at an outsourcing company, focusing on optimizing workflows and reducing timelines. Always eager to learn and implement innovative solutions to improve performance and user experience.
